US Army Corps
of Engineers.

SOUTH PACIFIC DIVISION

PUBLIC NOTICE

PARTIAL REGULATORY BOUNDARY ADJUSTMENT IN CALIFORNIA

333 Market Street
ATTN: CESPD-ET-C
San Francisco, CA 94105-2197

DATE: 1 November 2000

The three Army Corps of Engineers district offices in California (Los Angeles, Sacramento and San Francisco) have realigned a portion of their regulatory boundaries in California to simplify coordination and improve communication between major applicants and the Corps' Regulatory Branches. This change will take effect on the date of this Public Notice. It should be noted that this boundary adjustment does *not* change any of the regulations that govern the Corps' permit program.

The realignment is along county boundaries and affects the following counties (see the attached drawing): Modoc, Siskiyou, Glenn, Lake, Napa, Monterey, San Benito and San Luis Obispo. *All other counties in California are not affected.* The following table clarifies which Corps district administers the Regulatory program in the affected counties.

Administration of the Corps Regulatory Program
(counties in California affected by this Public Notice)

County	*Corps District*
Modoc	Sacramento
Siskiyou	San Francisco
Glenn	Sacramento
Lake	Sacramento
Napa	San Francisco
Monterey	San Francisco
San Benito	San Francisco
San Luis Obispo	San Francisco/Los Angeles

Other counties were not realigned by political boundaries because the existing drainage basin approach appears not to cause any noticeable issues in coordination between major applicants and the respective Corps districts.

All applicants in the affected counties should begin to apply for *new* permits (standard and nationwide permits) to the Corps district office based on the above table. All new jurisdictional determinations (wetlands and waters of the U.S.) will also be made by the appropriate Corps district office according to the above table. *Pending* applications for Corps permits in the affected counties will continue to be evaluated and processed by the Corps office that currently has your application.

Points of contact for the three Corps districts are:

Corps District Office	Point of Contact for the Regulatory Program	Phone number
Los Angeles	David Castanon	805-641-3730
Sacramento	Art Champ	916-557-5250
San Francisco	Calvin Fong	415-977-0461

For further information about the realignment, you can write to Mr. Wade Eakle at the address at the head of the Public Notice, or call 415-977-8030.
