LOS ANGELES DISTRICT
U.S. ARMY CORPS OF ENGINEERS

DEPARTMENT OF THE ARMY REGIONAL GENERAL PERMIT NUMBER 53 FOR COUNTY OF SAN DIEGO ROUTINE FLOOD CONTROL MAINTENANCE ACTIVITIES

Permittee: San Diego County, Department of Public Works

Project Name: Regional General Permit 53

Permit Number: SPL-2015-00131-MG

Issuing Office: Los Angeles District

Note: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official acting under the authority of the commanding officer.

After you receive written approval that your project complies with the terms and conditions of this Regional General Permit (RGP) from this office, you are authorized to perform work in accordance with the General Conditions and any project specific conditions specified below.

Project Description: This RGP authorizes mechanical sediment, vegetation, and debris removal activities (maintenance activities) of bridges, culverts and selected channels to prevent flooding of existing adjacent roadways and/or properties, as shown on the attached RGP 53 Master Inventory Table.

(1) This RGP 53 authorizes maintenance activities in approximately 1,057 facilities, including culverts, bridges, and channels, as identified in the RGP 53 Master Inventory.

(2) This RGP 53 limits the maintenance activities to the minimum necessary, as identified in the attached RGP 53 Master Inventory Table, to alleviate the flooding potential in the immediate vicinity and restore flow to selected culverts, bridges, and channels.

Project Location: In various waters of the United States (U.S.) throughout San Diego County (County), California (Figure 1).

GENERAL CONDITIONS OF THIS RGP:

1. Time Period Covered: This RGP shall expire on January 18, 2021.

2. Notification:
   a. Timing: County Department of Public Works must notify the U.S. Army Corps of Engineers (Corps) and State Water Resources Control Board (SWRCB) two months prior to beginning any project, and shall not commence the activity until a Notice to Proceed verification of compliance with RGP 53 is received from the Corps or thirty days have passed since the Corps received a complete notification package. The Corps maintains discretion to add Special Conditions to RGP 53 verifications to clarify compliance with the terms and conditions of RGP 53 to ensure that the proposed maintenance would have only minimal individual and cumulative adverse impacts to the environment.
   b. Contents of notification: The notification must be in writing (Standard permit application form may be used, ENG 4345) and include the following information for each facility proposed to be maintained:
      i. Facility location, including latitude and longitude or UTM coordinates;
      ii. Brief description of the work to be performed, including methods and equipment, in waters of the U.S.;
      iii. Facility type (e.g., box culvert, open channel etc.);
      iv. Total area and type of habitat to be permanently (e.g., first maintenance event) and temporarily impacted;
      v. Description of adjacent habitats likely to be affected; and
      vi. Proposed mitigation. The County is required to provide compensatory mitigation for permanent and temporary impacts to waters of the U.S. Permanent impacts are those that occur the first time any specific reach of a culvert, bridge, or channel is impacted by authorized maintenance activities under RGP 53. Temporary impacts to waters of the U.S. under RGP 53 are defined as repeat impacts to any specific reach of a culvert, bridge, or channel that has been previously maintained and permanent impacts mitigated for under RGP 53 (including previous RGP 53 authorizations). To ensure that all compensatory mitigation is commensurate with the level of impact, the proposed mitigation will follow the order of preferred mitigation options presented in 33 CFR 332.3(b)(2)-(6) and will be determined using the *Regulatory Program Standard Operating Procedure for Determination of Mitigation Ratios* .

   c. Corps Decision: In reviewing the notification for the proposed activity, the Corps will determine whether or not the activity qualifies for authorization under RGP 53. Only those activities that would result in no more than minimal adverse environmental effects would be authorized under RGP 53. If the Corps determines a project could have more than minimal individual or cumulative impacts, then discretionary authority, as defined in 33 CFR section 330.4(e), may be asserted and the applicant will be notified that another form of Department of the Army authorization, such as an individual permit is required.

3. The Permittee shall maintain copies of the terms and conditions of this RGP 53 on each site and will ensure that all contractors and field crews are made aware of the conditions and restrictions within to insure that the general and special conditions are complied with.

4. Any work performed under RGP 53 must be the minimum necessary (i.e., limited to the low flow channel or half the channel width) to alleviate flooding potential in the immediate vicinity and shall not exceed the limits specified for each site as identified in the attached RGP 53 Master Inventory. The Permittee shall clearly mark the limits of the authorized workspace with flagging or similar means. Adverse impacts to waters of the U.S. beyond the Corps-approved construction footprint are not authorized. Such impacts could result in permit suspension and revocation, administrative, civil or criminal penalties, and/or substantial, additional, compensatory mitigation requirements.

5. *Water Quality Certification*: Maintenance activities at sites 57-153, FC-132, FC-133, 58-088, 39-175, and 58-087 is contingent upon the issuance of Section 401 Water Quality Certification (WQC). The Permittee shall abide by the terms and conditions of the Section 401 WQC. The Permittee shall submit the section 401 WQC to the Corps Regulatory Division (preferably via email) within two weeks of receipt from the issuing state agency. The Permittee shall not proceed with maintenance activities at sites 57-153, FC-132, FC-133, 58-088, 39-175, and 58-087 until receiving an e-mail or other written notification from Corps Regulatory Division acknowledging the Section 401 WQC has been received, reviewed, and determined to be acceptable. For the remaining 1,051 facilities, the Permittee shall ensure that water quality is maintained by incorporating the terms and conditions of the amended Section 401 WQC issued by the State Water Resources Control Board (Certification Number SB09016GN) for your project, dated October 30, 2015. You must comply with the conditions specified in the Certification as special conditions to this permit.

6. *Endangered Species Act*: This Corps permit does not authorize you to take any threatened or endangered species, in particular arroyo toad [*Anaxyrus californicus* (*Bufo microscaphus c.*)], least Bell's vireo (*Vireo bellii pusillus*), southwestern willow flycatcher (*Empidonax traillii extimus*), and coastal California gnatcatcher (*Polioptila californica californica*) or adversely modify its designated critical habitat. In order to legally take a listed species, you must have separate authorization under the Endangered Species Act (ESA) (e.g. ESA Section 10 permit, or a Biological Opinion (BO) under ESA Section 7, with "incidental take" provisions with which you must comply). Pursuant to the enclosed U.S. Fish and Wildlife Service (USFWS) Biological Opinion (1-6-98-F-37) dated December 22, 2015, including the required avoidance and minimization measures, the Corps Regulatory Division has determined and the USFWS has concurred that your activity is not likely to adversely affect the above species. Your authorization under this Corps permit is conditional upon your compliance with all of the required avoidance and minimization measures, which are incorporated by reference in this permit. Failure to comply with the required avoidance and minimization measures would constitute non-compliance with your Corps permit.

7. *Cultural Resources:* Pursuant to 36 C.F.R. section 800.13, in the event of any discoveries during construction of either human remains, archeological deposits, or any other type of historic property, the Permittee shall notify the Corps Regulatory Division Project Manager (Melanie Tymes at 760-602-4841) and Corps' Archeology Staff within 24 hours (Danielle Storey at 213-452-3855). The Permittee shall immediately suspend all work in any area(s) where potential cultural resources are discovered. The Permittee shall not resume construction in the area surrounding the potential cultural resources until the Corps Regulatory Division re-authorizes project construction, per 36 C.F.R. section 800.13.

8. *Coastal Zone Management*: For those RGP 53 facilities affecting uses or resources of the coastal zone, the Federal Coastal Zone Management Act (CZMA) requires that the Permittee obtain concurrence from the California Coastal Commission that the project is consistent with the State's certified Coastal Management Program.

9. No mechanized equipment, rubber-tired vehicles, track vehicles, or other equipment shall be stored or fueled in waters of the U.S., including wetlands. Heavy equipment working in wetlands must be placed on mats, or other measures must be taken to avoid and minimize impacts to wetlands and non-wetland waters of the U.S.

10. No discharge of dredged or fill material may consist of unsuitable material (e.g., trash, debris, car bodies, asphalt, etc.,) and material discharged must be free from toxic pollutants in toxic amounts (see section 307 of the Clean Water Act).

11. All excavated material and vegetation shall not be stockpiled in waters of the U.S. and will be disposed of at a suitable upland site.

12. The Permittee shall submit to the Corps Regulatory Division by June 1 of each year an annual report including the following information:
    a. Summary of permanent and temporary impacts to waters of the U.S.
    b. Summary of compliance status with each special condition of this permit (including any noncompliance that previously occurred or is currently occurring and corrective actions taken or proposed to achieve compliance);
    c. Color photographs taken at the first time maintenance sites before and after the authorized maintenance activities such that the extent of authorized maintenance and proposed mitigation can be verified; and
    d. Updated credit ledger for the Sweetwater Off-site Mitigation Area (SWOMA).

Further Information:

1. **Congressional Authorities**: You have been authorized to undertake the activity described above pursuant to:

( ) Section 10 of the River and Harbor Act of 1899 (33 U.S.C. 403).
(X) Section 404 of the Clean Water Act (33 U.S.C. 1344).
( ) Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. **Limits of this authorization under RGP 53:**

a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal project.

3. **Limits of Federal Liability:** In issuing this permit, the Federal Government does not assume any liability for the following:

a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.

b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

d. Design or construction deficiencies associated with the permitted work.

e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. **Reliance on Applicant's Data:** The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. **Reevaluation of Permit Decision:** This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

a. You fail to comply with the terms and conditions of this permit.

b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (See 4 above).

c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measure ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

This permit becomes effective when the Federal official, designated to act for the Secretary of the Army, has signed below.
