4/21/2025	PM 2.5	Avg, ug/M3	16	21	4	20	18	18	21	13	19	23	70	35	PM2.5 alert was noted at ECC-02 at 15:30, AMT responded and there was an active debris crew working upwind of the station directly across the street. No visible dust was coming from the crew activities and the site seemed sufficiently saturated with water. Upon arrival at location, a water truck was passing through and briefly after the alert exited. It is suspected that dust created by vehicles passing through was the cause of the alert. PM2.5 alert was noted at ECC-10 at 13:45, AMT responded to alert and upon arrival the crew working directly adjacent to station noted dust coming from vehicles passing site. Crew was not performing any activities that created dust at the time of alert and were preparing for site walk. A water truck was requested, and it came to address road dust. PM2.5 alert was noted at ECC-05 at 9:00, AMT responded to alert and upon arrival, an excavator was being mobilized, and a street sweeper followed the excavator creating dust. Homeowners on the other side of the road were performing yard work as well. Alert is suspected to be caused by both activities. Alert at ECC 07 was not debris crew related it was related to the units being picked up. There were 0 exceedances of the Action limit or the Project Limit for the day.
