Dear Mr. Anderson:

Section 1002 of the Water Resources Reform and Development Act (WRRDA) of 2014 requires the U.S. Army Corps of Engineers' District Engineers to provide non-Federal partners with notification of feasibility study milestones scheduled for all active studies that received General Investigation appropriations between October 1, 2009, and June 10, 2014. These letters will also be prepared for studies initiated after June 10, 2014. The letters allow for greater transparency and a formal notification and reporting of feasibility study milestones.

We received letters from Pinal County representatives, dated July 1 and 2, 2020. These letters expressed an interest to terminate this study and pursue future potential projects utilizing the Continuing Authorities Program. Our respective staffs will coordinate to close out this study. Section 1002 requirements will no longer apply, and this will be the last formal Section 1002 notification letter addressing feasibility study milestones.
