

Los Angeles County Drainage Area (Disposition) Investigations

U.S. ARMY CORPS OF ENGINEERS

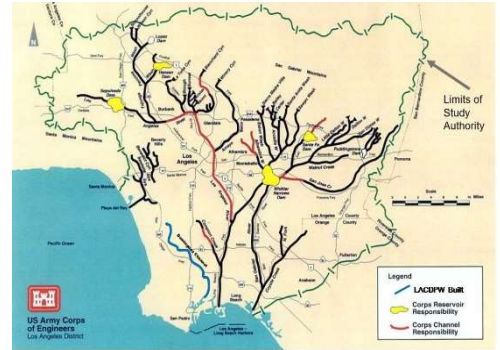

BUILDING STRONG®

LOCATION AND DESCRIPTION:

The LACDA system includes 40 miles of authorized levees and channels for flood risk management for metropolitan areas of Los Angeles County. It includes facilities on the Los Angeles and San Gabriel Rivers, Rio Hondo, Ballona Creek and their tributaries. The system includes reservoirs, debris basins, tributaries and main channel improvements.

AUTHORIZATION:

Disposition studies are conducted under the authority of Section 216 of the Flood Control Act of 1970. The LACDA System was authorized by the Flood Control Act of 1941. The authorization incorporated previously authorized and constructed facilities into the LACDA System.

ACTIVITIES FOR FY 2021:

- Initiate Disposition Study
 - Decision Milestone.
 - Develop scope of work through tentatively selected plan, TSP, milestone.

FY 2022 PLANNED ACCOMPLISHMENTS:

Prepare for and hold TSP.

ISSUES AND OTHER INFORMATION:

Held the Decision Milestone 1 March 2021. Approved to prepare scopes or work to complete the TSP and evaluate methods conducive to transferring O&M responsibilities to LA County. This is not a typical disposition study. The LACDA channels still offer flood risk reduction benefits. The County maintains much of the channels. The Corps maintained dams and reservoirs are not part of this evaluation. Nor is the section of river included in the LA River Ecosystem Restoration Project (approximately 11 miles through Glendale Narrows).

CONGRESSIONAL INTEREST:

Congresswoman Chu (CA-27) Congressman Schiff (CA-28) Congressman Cardenas (CA-29)
Congressman Sherman (CA-30) Congresswoman Napolitano (CA-32) Congressman Lieu (CA-33)
