

Los Angeles County Flood Control System, CA

Investigations

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

LOCATION AND DESCRIPTION:

The study area, the flood risk management system built by the U.S. Army Corps of Engineers between 1938 and 1960, is almost entirely within Los Angeles County in southern California. The 2,100 square mile area includes the watersheds of the Los Angeles, San Gabriel, and Rio Hondo Rivers as well as the major tributaries of Arroyo Seco, Compton Creek, Tujunga Wash and Verdugo Wash. All other coastal watersheds draining into the Santa Monica and San Pedro Bays are also part of the system, including Ballona Creek and Dominguez Creek.

AUTHORIZATION:

Senate Committee on Public Works Resolution, approved June 25, 1969.

ACTIVITIES FOR FY 2021:

Project has been terminated and closed out.

FY 2022 PLANNED ACCOMPLISHMENTS:

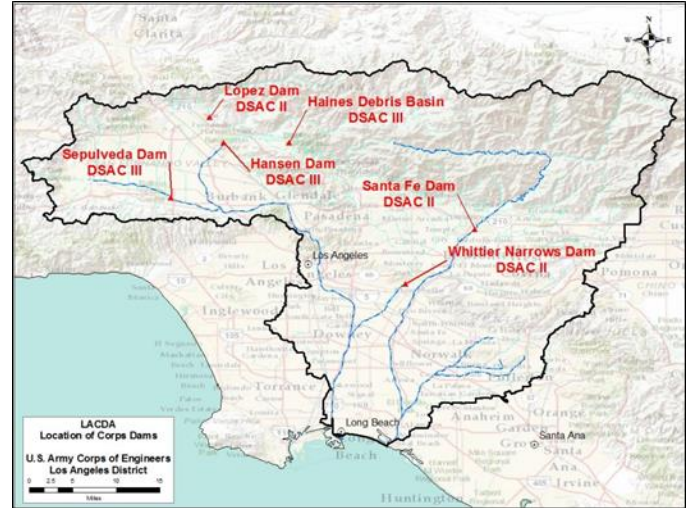

None.

ISSUES AND OTHER INFORMATION:

Limited floodplains for the 50,100, 200 and 500 year events – no significant damages. No structural/non-structural alternatives are justified.

CONGRESSIONAL INTEREST:

Congresspersons: Schiff (28), Cardenas (CA-29), Sherman (CA-30), Napolitano (CA-32), Bass (CA-37), Sanchez (CA-38), Roybal-Allard (CA-40), Waters (43), Barragan (CA-44), and Lowenthal (47).

As of 23 Mar 2021

FINANCIAL SUMMARY:
