

PUBLIC NOTICE

Lake Elsinore Outlet Channel – 2 x 36" diameter RCP storm drain pipe connections into Lake Elsinore Outlet Channel

U.S. ARMY CORPS OF ENGINEERS LOS ANGELES DISTRICT

BUILDING STRONG®

Public Notice No.: 408-SPL-PN-2020-0024

Permit No.: 408-SPL-2020-0024

Comment Period: 2020-06-11 to 2020-07-10

Requester: In compliance with U.S.C. Title 33, Chapter 9, Subchapter 1, Section 408, the Riverside County Flood Control and Water Conservation District (RCFCWCD), has requested permission from the U.S. Army Corps of Engineers (USACE) to alter the Lake Elsinore Outlet Channel.

Location:

The proposed action would construct 2 x 36" diameter RCP storm drain pipe connections into Lake Elsinore Outlet Channel north of Chaney Street between Education Way and Treleven Avenue in the City of Lake Elsinore, Riverside County, California. The proposed features are in-river, which will require construction within the channel.

Requester's Proposed Action:

RCFCWCD is proposing to construct 2 x 36-inch diameter RCP storm drain pipe connections into Lake Elsinore Outlet Channel using headwall structure and riprap. The pipes would be buried at an approximate depth of 6 feet from existing ground surface, discharging at an angle of 60 degree to the channel alignment. At the discharge location, a minimum of 2-ft thick grouted riprap would be placed in the eastern half of the channel bottom, followed by a minimum of 2-ft thick ungrouted riprap on the western half of channel bottom and approximately 4 feet in the opposite paved channel slope. The proposed storm drain system for the project will discharge offsite via one new storm drain outlet into the Lake Elsinore Channel, which extends along the southwesterly project boundary.

The purpose of the project is to provide adequate stormwater drainage to a proposed light industrial facility, office spaces, parking and landscaping to be built adjacent to the channel. The proposed storm drain outlet would be needed to allow discharge of stormwater flows to the nearest regional storm water facility.

Authority: The authority to grant permission for temporary or permanent use, occupation or alteration of any USACE Civil Works project is contained in Section 14 of the Rivers and Harbors Act of 1899, as amended, codified at 33 USC 408 ("Section 408"). Section 408 authorizes the Secretary of the Army, on the recommendation of the Chief of Engineers, to grant permission for the alteration or occupation or use of a USACE project if the Secretary determines that the activity will not be injurious to the public interest and will not impair the

usefulness of the project. The Secretary of Army's authority under Section 408 has been delegated to the USACE, the Chief of Engineers. The Chief of Engineers has further delegated the authority to the USACE, Directorate of Civil Works and Division and District Engineers, depending upon the nature of the activity.

Limits of Section 408 Authority: A requester has the responsibility to acquire all other permissions or authorizations required by federal, state, and local laws or regulations, including any required permits from the USACE Regulatory Program under Section 10 of the Rivers and Harbors Act of 1899 (33 USC 403), Section 404 of the Clean Water Act (33 USC Section 1344), and/or Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 USC 1413). The compliance determination for any Section 10/404/103 permit decision associated with the proposed alteration will also address the Section 408 compliance determination. In addition, an approval under Section 408 does not grant any property rights or exclusive privileges nor does it authorize any injury to the property or rights of others.

Consideration of Comments: The Corps is soliciting comments from the public, Federal, State and local agencies and officials, and other interested parties. Comments will be made part of the record, and they will be considered before permission is granted to proceed with this action. Please limit comments to the area of the alteration and those adjacent areas that would be directly or indirectly affected by the alteration described in this public notice.

Submission of Comments: Interested parties may submit, in writing, any comments concerning this proposal. Comments should reference public notice no. 408-SPL-PN-2020-0024 and be forwarded by the comment due date of July 10 2020. Comments must be sent to the U.S. Army Corps of Engineers, Los Angeles District, Engineering Division, ATTN.: Priyo Majumdar, 915 Wilshire Boulevard, Suite 930, Los Angeles, California 90017-3409. Alternatively, comments can be sent electronically to Priyodarshi.Majumdar@usace.army.mil.
