**APPLICATION FOR PERMIT
Re-Issuance of the County of San Diego Drainage Facility Maintenance
Regional General Permit 53**

Public Notice/Application No.: SPL-2020-00085-CJA

Project: Re-Issuance of Regional General Permit 53 for County of San Diego Drainage Facility Maintenance

Comment Period: March 12, 2020 through April 12, 2020

Project Manager: Chris Allen; (760) 602-4836; christopher.allen@usace.army.mil

Applicant

Thomas Duffy
County of San Diego
Department of Public Works
5510 Overland Avenue, Suite 410
San Diego, California 92123

Contact

Sue Waters
County of San Diego
Department of Public Works
5510 Overland Avenue, Suite 410
San Diego, California 92123

Location

The proposed re-Issuance of Regional General Permit 53 would authorize discharges of fill materials associated with drainage facility maintenance activities occurring throughout the County of San Diego to be conducted by the County of San Diego Department of Public Works, County of San Diego Flood Control District, County of San Diego Department of Parks and Recreation, and County of San Diego Department of General Services (Enclosure 1).

Activity

The County of San Diego Department of Public Works has applied for a renewal of the existing Regional General Permit (RGP) 53. The existing RGP-53 expires on January 18, 2021. The proposed renewal of RGP-53 would authorize discharges of fill materials into water of the U.S. to conduct routine drainage facility maintenance activities including sediment, debris, and vegetation removal. For more information see Additional Project Information section below.

Interested parties are hereby notified an application has been received for a Department of the Army permit for the activity described herein and shown on the attached drawing(s). We invite you to review today's public notice and provide views on the proposed work. By providing substantive, site-specific comments to the Corps Regulatory Division, you provide information that supports the Corps' decision-making process. All comments received during the comment period become part of the record and will be considered in the decision. This permit will be issued, issued with special conditions, or denied under Section 404 of the Clean Water Act. Comments should be mailed to:

DEPARTMENT OF THE ARMY
LOS ANGELES DISTRICT, U.S. ARMY CORPS OF ENGINEERS
REGULATORY DIVISION
ATTN: Stephen Roethle
5900 LA PLACE COURT, SUITE 100
CARLSBAD, CA 92008

Alternatively, comments can be sent electronically to: christopher.allen@usace.army.mil

The mission of the U.S. Army Corps of Engineers Regulatory Program is to protect the Nation's aquatic resources, while allowing reasonable development through fair, flexible and balanced permit decisions. The Corps evaluates permit applications for essentially all construction activities that occur in the Nation's waters, including wetlands. The Regulatory Program in the Los Angeles District is executed to protect aquatic resources by developing and implementing short- and long-term initiatives to improve regulatory products, processes, program transparency, and customer feedback considering current staffing levels and historical funding trends.

Corps permits are necessary for any work, including construction and dredging, in the Nation's navigable water and their tributary waters. The Corps balances the reasonably foreseeable benefits and detriments of proposed projects, and makes permit decisions that recognize the essential values of the Nation's aquatic ecosystems to the general public, as well as the property rights of private citizens who want to use their land. The Corps strives to make its permit decisions in a timely manner that minimizes impacts to the regulated public.

During the permit process, the Corps considers the views of other Federal, state and local agencies, interest groups, and the general public. The results of this careful public interest review are fair and equitable decisions that allow reasonable use of private property, infrastructure development, and growth of the economy, while offsetting the authorized impacts to the waters of the United States. The permit review process serves to first avoid and then minimize adverse effects of projects on aquatic resources to the maximum practicable extent. Any remaining unavoidable adverse impacts to the aquatic environment are offset by compensatory mitigation requirements, which may include restoration, enhancement, establishment, and/or preservation of aquatic ecosystem system functions and services.

Evaluation Factors

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit, which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof. Factors that will be considered include conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food production and, in general, the needs and welfare of the people. In addition, if the proposal would discharge dredged or fill material, the evaluation of the activity will include application of the EPA Guidelines (40 CFR Part 230) as required by Section 404 (b)(1) of the Clean Water Act.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian tribes; and other interested parties in order to consider and evaluate the impacts

of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Preliminary Review of Selected Factors

EIS Determination- A preliminary determination has been made an environmental impact statement is not required for the proposed work.

Water Quality- The applicant is required to obtain water quality certification, under Section 401 of the Clean Water Act, from the California Regional Water Quality Control Board. Section 401 requires any applicant for an individual Section 404 permit provide proof of water quality certification to the Corps of Engineers prior to permit issuance.

Coastal Zone Management- For those projects in or affecting the coastal zone, the Federal Coastal Zone Management Act requires that prior to issuing the Corps authorization for the project, the applicant must obtain concurrence from the California Coastal Commission the project is consistent with the State's Coastal Zone Management Plan. The District Engineer hereby requests the California Coastal Commission's concurrence or non-concurrence.

Essential Fish Habitat- No Essential Fish Habitat (EFH), as defined by the Magnuson-Stevens Fishery Conservation and Management Act, occurs within the project area and no EFH is affected by the proposed project

Cultural Resources- The Corps will initiate consultation with the State Historic Preservation Officer (SHPO) pursuant to Section 106 of the National Historic Preservation Act (NHPA), as needed, to address any potential adverse effects to Historic Properties as a result of the authorization of discharges of fill material into waters of the United States associated with the implementation of the proposed activities.

Endangered Species- Pursuant to the Re-initiation Notice of the Biological Opinion (I-6-98-F-37), dated December 21, 2015, issued for the current RGP-53, the Corps is required to re-initiate formal consultation with the U.S. Fish and Wildlife Service (USFWS) pursuant to Section 7 of the Endangered Species Act (ESA) where discretionary Federal agency involvement or control over the action has been retained and if (1) the amount or extent of incidental take authorized in the biological opinion has been exceeded; (2) new information reveals effects not considered in the biological opinion; (4) the agency action is subsequently modified in a manner that causes an effect to the listed species or critical habitat not considered in this opinion; or a new species is listed or critical habitat designated that may be affected by the action. The Corps will evaluate the four factors listed above and determine whether re-initiation of formal Section 7 consultation is appropriate for the re-issuance of the proposed RGP-53.

Public Hearing- Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for public hearing shall state with particularity the reasons for holding a public hearing.

Proposed Activity for Which a Permit is Required

Basic Project Purpose- The basic project purpose comprises the fundamental, essential, or irreducible purpose of the proposed project, and is used by the Corps to determine whether the applicant's project is water dependent (i.e., requires access or proximity to or siting within the special aquatic site to fulfill its basic purpose). Establishment of the basic project purpose is necessary only when the proposed activity would discharge dredged or fill material into a special aquatic site (e.g., wetlands, pool and riffle complex, mudflats, coral reefs). The basic project purpose for the proposed project is flood control. The project is not water dependent.

Overall Project Purpose- The overall project purpose serves as the basis for the Corps' 404(b)(1) alternatives analysis and is determined by further defining the basic project purpose in a manner that more specifically describes the applicant's goals for the project, and which allows a reasonable range of alternatives to be analyzed. The overall project purpose for the proposed RGP is to conduct storm water channel maintenance activities in order to maintain the effectiveness of County of San Diego's storm water facilities.

Additional Project Information

Baseline information- The County of San Diego is responsible for maintaining storm water facilities throughout the County of San Diego as shown in Enclosure 1. Storm water facilities include a network of underground storm drain pipes, culverts, outlet/inlet structures (e.g., headwalls), detention basins, ditches, and channels. In some cases, these facilities are existing naturally and/or designed and installed to convey storm flows.

Project description- The purpose of this RGP is to authorize discharges of fill material associated with routine storm water and channel maintenance activities. Routine storm water facility maintenance activities including sediment, debris, and vegetation removal. See Enclosure 2 for a list of facilities and for a list of proposed covered activities that may result in a discharge of fill material into waters of the U.S.

Proposed Mitigation- The proposed mitigation may change as a result of comments received in response to this public notice, the applicant's response to those comments, and/or the need for the project to comply with the 404(b)(1) Guidelines. In consideration of the above, the proposed mitigation sequence (avoidance/minimization/compensation), as applied to the proposed project is summarized below:

Avoidance: The County of San Diego Department of Public Works would avoid impacts to waters of the United States to the maximum extent practicable. Site specific avoidance measures will be determined on a case by case basis.

Minimization: The County of San Diego Department of Public Works would minimize impacts to waters of the United States to the maximum extent practicable when avoidance is not possible. Site specific minimization measures will be determined on a case by case basis.

Compensation: In cases where impacts to waters are more than minimal, compensatory mitigation will be required. Any compensatory mitigation that is required to off-set impacts to waters of the U.S. will comply the 2008 mitigation rule.

Proposed Special Conditions

Special conditions may be added to a Department of the Army permit when such conditions are necessary to satisfy legal requirements or to otherwise satisfy the public interest requirement. The need for permit special conditions will be considered during permit evaluation period. Any resulting permit special conditions will be directly related to the impacts of the proposal, appropriate to the scope and degree of those impacts, and reasonably enforceable.

For additional information please call Chris Allen of my staff at (760) 602-4836 or via e-mail at christopher.allen@usace.army.mil. This public notice is issued by the Chief, Regulatory Division.

Regulatory Program Goals:

- To provide strong protection of the nation's aquatic environment, including wetlands.
- To ensure the Corps provides the regulated public with fair and reasonable decisions.
- To enhance the efficiency of the Corps' administration of its regulatory program.
